PROJECTS

VedaAI | AI-Assisted Healthcare Triage Platform

[Link](#) | [GitHub](#)

- Built an AI-assisted healthcare platform for symptom triage, private concerns, and doctor connection.
- Developed patient and doctor dashboards with reports, notifications, and consultation workflows.
- Implemented a responsive full-stack app using React, Node.js, Express, and MongoDB.

RetainQ | Customer prediction System

[Link](#) | [GitHub](#)

- Built a full-stack customer prediction platform using MongoDB, ExpressJS, React and NodeJS, featuring an interactive dashboard for visualizing churn risk across customers.
- Achieved 84.08% ROC AUC and 77.71% test accuracy with logistic regression, selected as best model after comparing multiple approaches.
- Deployed as an interactive MERN stack web application with real-time prediction interface.

Nexus.sys | Job Finder

[Link](#) | [GitHub](#)

- Built a full-stack job aggregator using React, FastAPI, and Python scraping to collect and display job listings from external platforms.
- Implemented REST APIs, pagination, filtering, and local bookmarking for an improved job discovery experience.
- Deployed the application using Render (backend) and Netlify (frontend) with a responsive UI.
