ABOUT ME

Full-stack developer building **scalable, production-grade applications**, real-time systems, and **AI-powered platforms**. Skilled in **React, Node.js, Express, MongoDB, and Python**, with hands-on experience in **system design, microservices, API architecture, DevOps, and AI/ML integration**.

TECHNICAL SKILLS

Languages & Databases	JavaScript, Python, Java, C, SQL, MongoDB, PostgreSQL, Redis
Full Stack & Backend	React, Node.js, Express.js, React Native, REST APIs, Socket.IO, Tailwind CSS
DevOps & AI/ML	Docker, AWS (EC2, S3, CloudFront), Git, GitHub Actions, NGINX, PyTorch, Scikit-learn, OpenCV, LLM Integration, Agno

EXPERIENCE

Full-Stack Developer Intern **May 2026 – Aug 2026**
Infotattva Business Solutions Pvt. Ltd.

- Architected migration of a **10K+ active-user** monolith to **microservices**, implementing event-driven architecture, asynchronous processing, load balancing, and background jobs for improved scalability and service isolation.
- Designed secure **multi-tenant** backend systems with row-level data isolation, **JWT/OAuth, RBAC, and REST APIs**; deployed containerized services using **Docker, GitHub Actions, NGINX, and VPS-based CI/CD**.
- Delivered AI-integrated applications across **5+ client projects**, integrating OpenAI/Gemini for analysis and candidate scoring; reduced React page load times by **25%** through lazy loading and code splitting.

PROJECTS

Bangalore Rapids – B2B/B2C Logistics Platform bangalorerapid.online
MongoDB, Express.js, React, Node.js (MERN), Socket.IO, Stripe, Docker

- Built a multi-role logistics platform with **JWT/RBAC**, real-time driver tracking, **geospatial queries**, automated dispatch workflows and **real-time driver tracking for one-to-one parcel deliveries**.
- Integrated **Stripe** payments and ACID transactions; cut deployment time by **40%** using CI/CD automation and containerization.

SOLITX – Scalable Social Platform solitx.soumya.site
Node.js, Express.js, PostgreSQL, React, AWS

- Developed a social platform with authentication, profiles, posts, interactions, notifications, search, and personalized feeds, targeting **20K DAU** scalability.
- Improved database workloads using PostgreSQL transactions, indexing, query optimization, and load testing across latency, throughput, error rates, and resource utilization.
- Built cloud infrastructure with **AWS EC2, S3, CloudFront, and Load Balancing**, applying horizontal scaling, caching, CDN delivery, and centralized monitoring.

EDUCATION

Master of Computer Applications (MCA) 2025 – 2027
Trident Academy of Creative Technology, Bhubaneswar

Bachelor of Science (B.Sc.) – Computer Science 2023 – 2025
Banki Autonomous College, Banki

ACHIEVEMENTS

- Built and deployed production systems serving **100K+ active users** combined.
- Ranked among the **Top 7 teams out of 450+** teams in Trithon Hackathon.
- Built **25+ full-stack and ML projects** across web development, AI/ML, and system design.
